Job Description – Control Systems Engineer

RMGroup specialise in the supply of process and packaging machinery including robotic automation to various industries around the UK. The company continues to demonstrate rapid growth and continually seeks aspiring individuals to join the team.

If you have an expressed interest in robotics and automation, and are looking to progress further in this particular field then we welcome your application.

Desired Qualifications, Skills and attributes

- Ability to build electrical and software solutions around packaging and automation projects.
- Test programme philosophy on testing prior to machinery dispatch to ensure successful commissioning based on customer requirements.
- Train operators on site with use of machinery and able to provide aftercare support remotely.
- Effective interpersonal skills in order to work alongside Project Manager, Mechanical engineers and electricians to deliver the project as per customer specification.
- Minimum requirement of City & Guilds - Electrical Installation/Engineering, P1 & P2 or equivalent. HND/Degree in Electrical, Electronic or Software Engineering or equivalent experience favourable
- Potential candidates will receive training in programming for Industrial ABB Robots. Prior knowledge highly desirable but not necessary.

RMGroup supply and install packaging machinery across the country this role will involve travel and overnight stays.

Hours: +45 Hours, Monday-Friday.

Salary: Dependant on experience.

Included: Company Van, Fuel Card, Laptop, Uniform, Pension, Overnight Allowance, Accommodation and meals paid.

If you have any questions or would like to submit a CV please contact Rosie by telephone or email.
